/NEW/ Fully adjustable , easy to
mount foot straps with nylon cambers

/ Light, moulded EVA pads

/ Ergonomic grab handle

/NEW/ White, G10 Xe50 mm fins

THE FEEL:

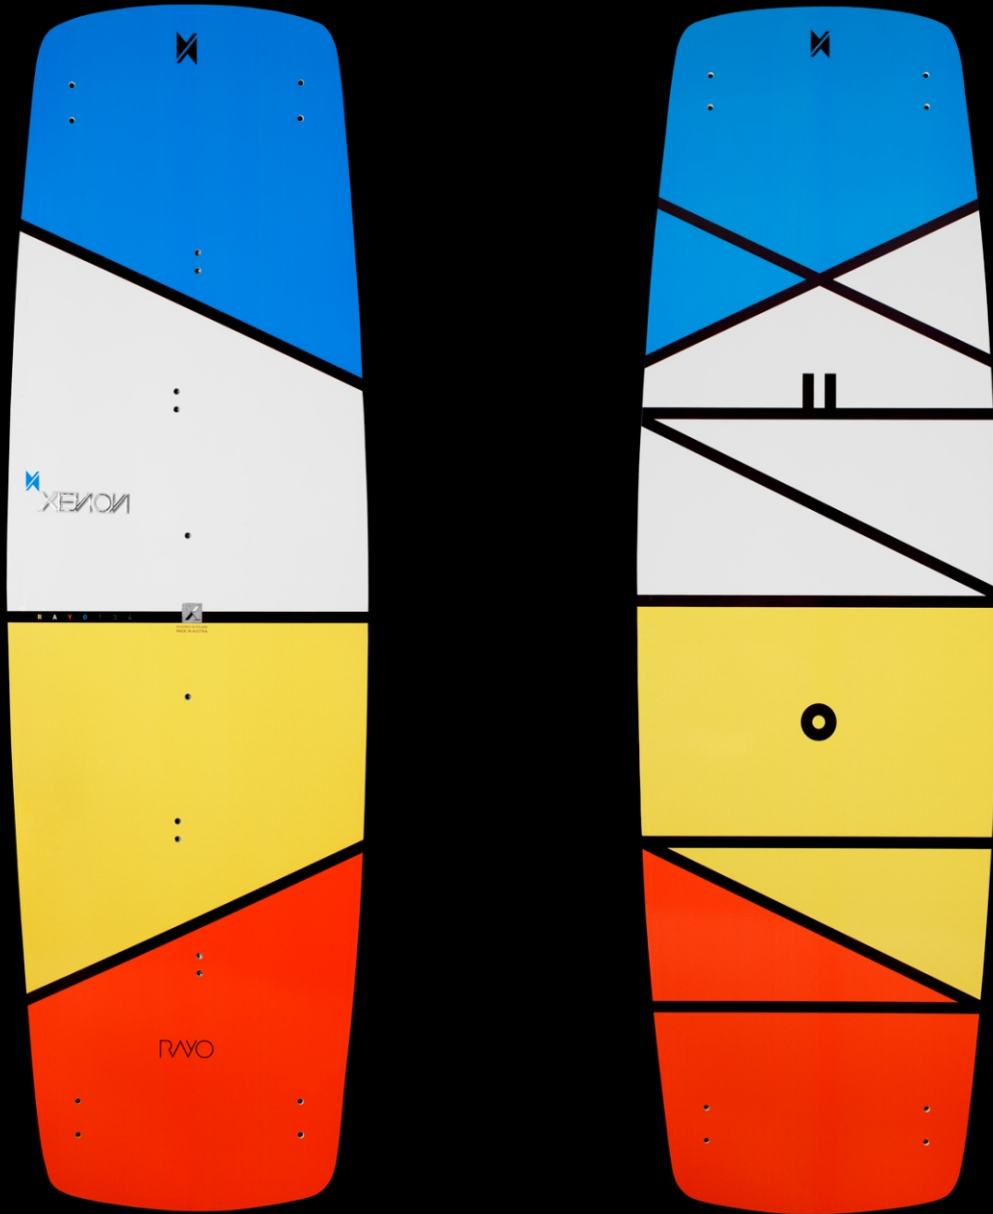

Laluz is consistently Xenon's high-performance freestyle board designed for a modern versatile style of kiteboarding. Proved outline with wide tip/tail combined with a high, continuous rocker line, deep single concave and a balanced flex result in outstanding performance. Compared to 2010 model, the latest version has a lively, hip feel to it and is highly responsive. The 2011 also now offers an extra wide stance on 132 and 135 for taller riders and new school lovers. The board comes with completely new, moulded EVA pads with a bi-directional pattern and new 50 mm G10 fins.

THE LOOK:

The new Laluz is undoubtedly the slickest looking board out there. Clean but not dull, simple but not banal, elegant but not boring... This year we designed the board as a whole, rather than a sum of bits and pieces such as base/sidewall/top.

CONSTRUCTION:

Full wood core laminated with Triax glass reinforced with carbon-kevlar stringers.

RAYO

/ Novice to advanced riders /

SIZE	STANCE
130 x 40 /	55,5-61,5cm
134 x 41 /	61,5-65,5cm
138 x 42 /	61,5-65,5cm
145 x 44 /	55,5-61,5cm

- /NEW/ Fully adjustable , easy to mount foot straps with nylon cambers
- / Light, moulded EVA pads
- / Ergonomic grab handle
- / White, G10 Xe54 mm fins

THE FEEL:

Rayo 2011 is an all-round twin-tip board with great freestyle potential that will propel you to the next level. The board offers all features you 'll need-great upwind abilities and a comfortable ride in most water and wind conditions. A variable flex, big rocker line and a fuller outline combine to bring a balance to this ideal board.

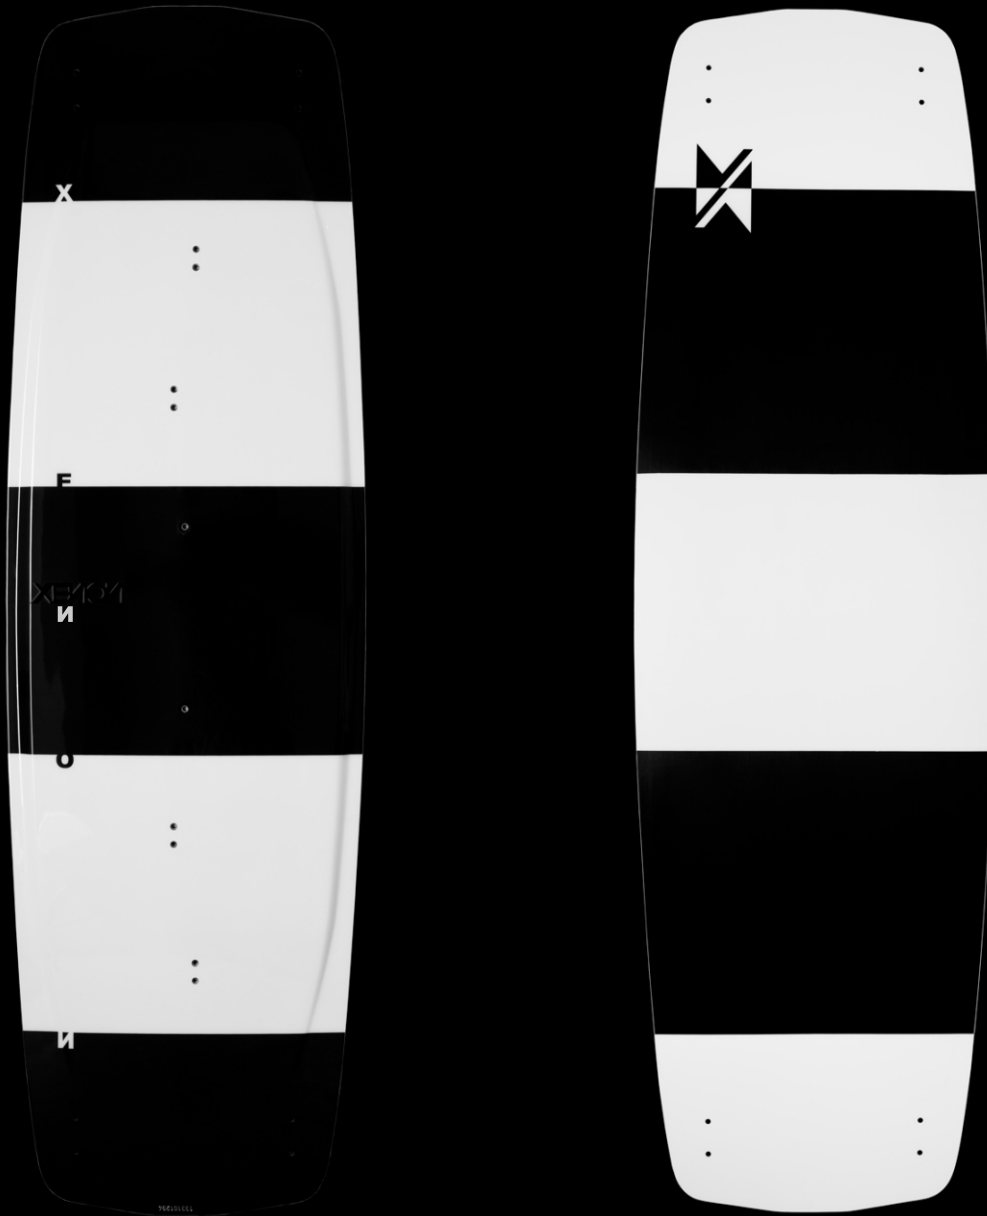

Compared to Rayo 2010, the new model is a bit stiffer and more aggressive, with an extra wide stance option on 134 and 138 for new school freestyle. The board comes with completely new moulded EVA pads with a bi-directional pattern.

THE LOOK:

Rayo continues to do nothing but impress and it is only getting better. The board is as bold, simple, geometric and colorful as its predecessor, yet by no means literally. We are certain this board will be a real eye-catcher, breath-taker, head-turner once again...

CONSTRUCTION:

Full wood core laminated with Biax fiber glass.

INFRA

/ Uncompromised riders /

SIZE STANCE
133 x 40 / 61,5-65,5cm

136 x 41 / 61,5-65,5cm

139 x 41 / 61,5-65,5cm

- /NEW/ Fully adjustable , easy to mount foot straps with nylon cambers
- / Light, moulded EVA pads
- / Ergonomic grab handle
- /NEW/ White, G10 Xe50 mm fins

THE FEEL:

Infra is a new arrival in our range. This is the answer for uncompromised, new school riders for whom the only important parameter is explosive pop. Riden best in flat water conditions, works great with straps as well as wakeboard bindings.

Infra features an aggressive shape with a sharp edge and the stiffest core in our 2011 twin tips line.

THE LOOK:

The Infra board is as straight forward as it gets. As you can see there are no grey areas. No place for uncertainty and doubt. Only black and white, like right and wrong, good and bad, love or hate. You either go big and hard or dont go at all. So basacaly you will either love this board or totally hate it but one thing is for sure, you wont stay indifferent.

CONSTRUCTION:

Full wood core laminated with Triax glass.
